

CorelDRAW

- 1). Select "FILE"
- 2). Select "IMPORT"
- 3). Select "PS,PRN,EPS" or "AI" as type of file
- 4). Select Drive & Directory and locate the image you wish to import
- 5). Select the file
- 6). Click on "OK"

Gerber

- 1). From the Composer module Select "FILE"
- 2). Select "IMPORT"
- 3). From IMPORT OPTIONS
- 4). Screen Select "OPTIONS"
- 5). From OPTIONS Screen
- 6). Turn "IGNORE STROKE ONLY DATA" OFF
- 7). Turn "USE PROCESS COLOR FOILS " ON
- 8). From IMPORT Screen Select "IMPORT" Choose EPS (Encapsulated Postscript) as file type
- 9). Select "FILE"
- 10). Select Drive & Directory and locate the image you wish to import
- 11). Click on "OK"
- 12). Click on "CONVERT"

NOTE: For Gerber 6.2 Users, turn "Use Stroke Paths" on. You may need to scale it twice, by 1000% then again by 200%

Adobe Illustrator

- 1). Select "FILE"
- 2). Select "OPEN"
- 3). Select "AI" as type of file
- 4). Select Drive & Directory and locate the image you wish to open
- 5). Select the file
- 6). Click on "OK"

NOTE: Illustrator operates on a specific page size, thereby limiting the size you can resize to. You will not be able to resize the vehicle up 2000% because of limited page size. To solve this problem, you can work on the vehicle at the 1:20 scale and to find your final dimensions multiply measurements by 20.

Anagraph

- 1). Select "FILE"
- 2). Select "IMPORT"
- 3). Select "Adobe Illustrator EPS,AI" as type of file
- 4). Select Drive & Directory and locate the image you wish to import
- 5). Select the file
- 6). Click on "OK"

Casmate

- 1). Select "FILE"
- 2). Select "IMPORT"
- 3). Select "EPS"
- 4). Select Drive & Directory and locate the image you wish to import
- 5). Select the file
- 6). Click on "OK"

Troubleshooting:

- A). Select "Group All" from the Hypergroup Menu
- B). Click COUNTERCLOCKWISE from the HYPERGROUP Menu
- C). Click on the Sort Button or select "Sort" from the Miscellaneous Menu
- D). Click on the PREVIEW Button
- E). With the Pointer Tool, select the black layer in front of the image and delete it
- F). Click on the "Set Color" Button and choose "Set Color" from the Edit Menu
- G). With the Paintbrush Tool, paint the body (and Door(s)) the color you wish the vehicle to be.
- H). With the Pointer Tool, select the body and doors you have just painted and arrange them "to back". (Edit Menu/Arrange/Send to back)

NOTE: Any other black images, e.g. doors, bumpers, mirrors may be duplicate shapes and as such, may be deleted. Some shapes may need to be sent to back. When printing a white vehicle you must place a thin black outline around the body and door(s) of the vehicle.

Flexisign

- 1). Select "FILE"
- 2). Select "MERGE" (for newer versions of FlexiSIGN select "open" or "import" option instead. Use the "open" option to open an image into a new document. Use the "import" option to open an image into a current document)
- 3). Select "EPS" or "AI, EPS" as type of file
- 3). Select Drive & Directory and locate the image you wish to merge, open or import
- 4). Select the file
- 5). Click on "OK"

SignLab

- 1). Select "FILE"
- 2). Select "OPEN"
- 3). Select "AI" or "EPS" as type of file
- 4). Select Drive & Directory and locate the image you wish to open
- 5). Select the file
- 6). Click on "OK"

Sign Wizard

- 1). Select "FILE"
- 2). Select "IMPORT"
- 3). Select "Adobe Illustrator EPS,AI" as type of file
- 4). Select Drive & Directory and locate the image you wish to import
- 5). Select the file
- 6). Click on "OK"
